Subject: Visit Follow-Up Question

Dear Dr. Feelgood,

Primarily at night, I experience Narco-necessary pain in the area of my right hip, the same area I experienced pain before radiation. Perhaps muscle related, since it is primarily at night when my muscles are cooling?

Thank you.

J. Ray Paradiso

Hi Mr. Paradiso,

How is your pain right now?

Has the Norco been helping with hip pain ?

Linda

Right now, the pain is minimal, and Narco does relieve the pain when I experience it. What are the chances that the pain is cancer-related? Thank you. J. Ray Paradiso

Hi,

It's difficult to say how much of your pain is directly from cancer versus other extraneous factors.

Your disease is within that right hip region and head of femur (acetabulum) region so the pain could be closely correlated to the affected area.

Please continue to take naproxen prn and Norco for pain management.

Thank you,

Linda

Subject: RE: Visit Follow-Up Question

Did my most recent MRI show the disease within that right hip region and head of femur (acetabulum) region?

Hi Mr. Paradiso,

Your recent MRI was of the lumbar spine only, so it doesn't show results within frontal region - abdomen/pelvis area.

Hope that clarifies your question.

Linda

Subject: RE: Visit Follow-Up Question

Would an Xray, CT scan or MRI of the frontal region - abdomen/pelvis area be helpful to determine my pain's source?

Good afternoon,

Can you let me know where your pain is?

Hips? Upper abdomen, lower abdomen, right or left side?

Brenda
